

Business Intelligence with Microsoft Power BI

Why Power BI

- Easy to Learn
- Latest Technology Updated monthly
- Affordable Software

Tools & Building Blocks

- ❑ There are Two other tools
- ❑ Power BI mobile
- ❑ For Developer

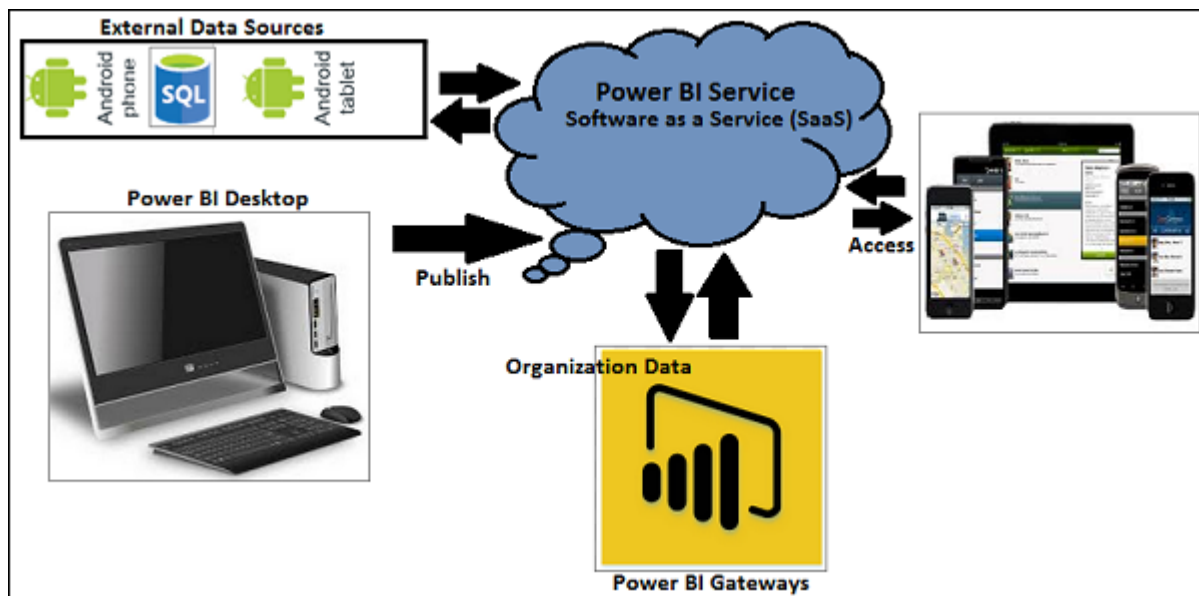

- ❑ Power BI Desktop
 - ❑ Local Application
- ❑ Datasets
- ❑ Visualizations
- ❑ Tiles
- ❑ Reports
- ❑ To Create New Datasets

- ❑ Power BI Service
 - ❑ Cloud
- ❑ Datasets
- ❑ Visualizations
- ❑ Tiles
- ❑ Reports
- ❑ To Connect Existing
 - ❑ Data Sets
- ❑ Dashboards
- ❑ Share Results

components

- **Power BI Desktop** – This is used to create reports and data visualizations on the dataset.
- **Power BI Gateway** – You can use Power BI on-premises gateway to keep your data fresh by connecting to your on-premises data sources without the need to move the data. It allows you to query large datasets and benefit from the existing investments.
- **Power BI Mobile Apps** – Using Power BI mobile apps, you can stay connected to their data from anywhere. Power BI apps are available for Windows, iOS, and Android platform.
- **Power BI Service** – This is a cloud service and is used to publish Power BI reports and data visualizations.

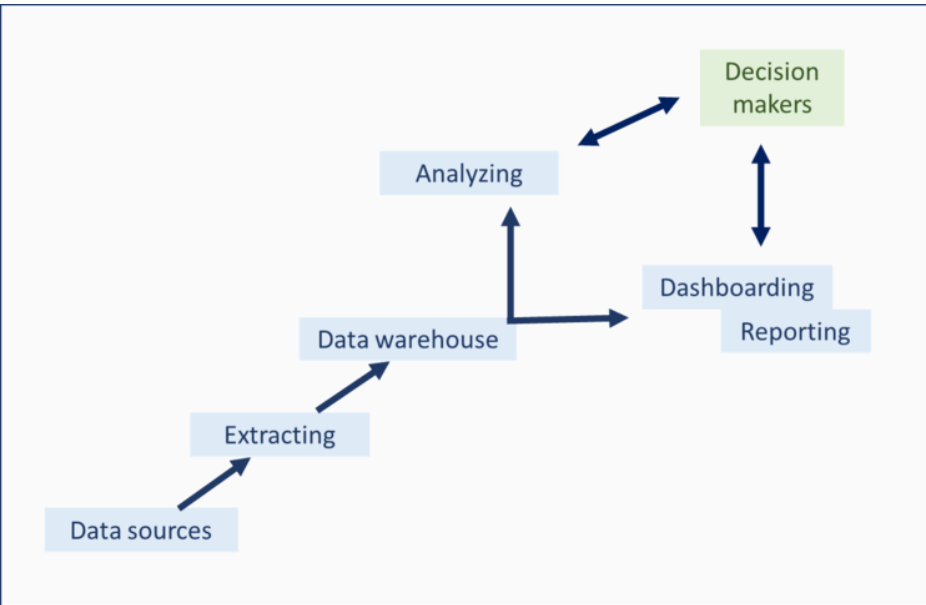

Business intelligence Concepts

- It refers to the usage of digital computing technologies in the form of data warehouses, analytics and visualization with the aim of identifying and analyzing essential business-based data to generate new, actionable corporate insights.

Project Requirements and Getting Data

What is the Flow of Report Development for a Business Analyst

Report Development Process

Importing data

- From WWW/excel
- Excel
- Restful APIs
- Databases

Cleaning the Data

- Data preparation – remove unwanted rows and columns.
- Query Editor
- Home -> Remove to rows
- Remove columns
- Merge columns
- Change data types

Importing data to Data Model

Create Visualizations

Reviewing Project Requirements and Determining Data Sources

Report Requirements

Data & Visualization Requirements

- Net Profit & Net Quantity Breakdowns
- Year-Over-Year net profit comparison by month
- Net Profit Running Historical Running Total
- Year-Over-Year profits by product Brand

Order Details Table:

- ⦿ Geography Information
- ⦿ Net Profits
- ⦿ Net Quantity
- ⦿ Order Count
- ⦿ Average Order Amount
- ⦿ Year-Over-Year Net Profits
- ⦿ Year-Over-Year Net Profit %

Report Filter Requirements

- Year Filter
- Channel Filter
- Geography & Store Filters
- Product Filters

Power BI Reports

Connecting to Data Source with Power Query

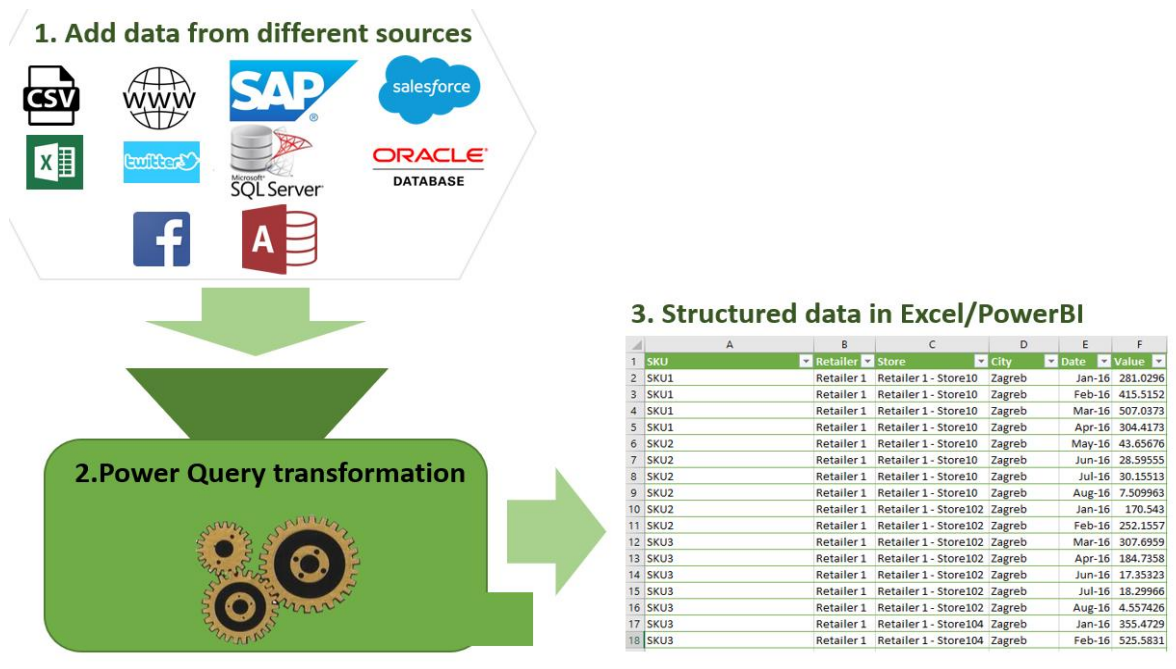

Bring the attention of your audience over a key
concept using icons or illustrations

Connecting to Data Source

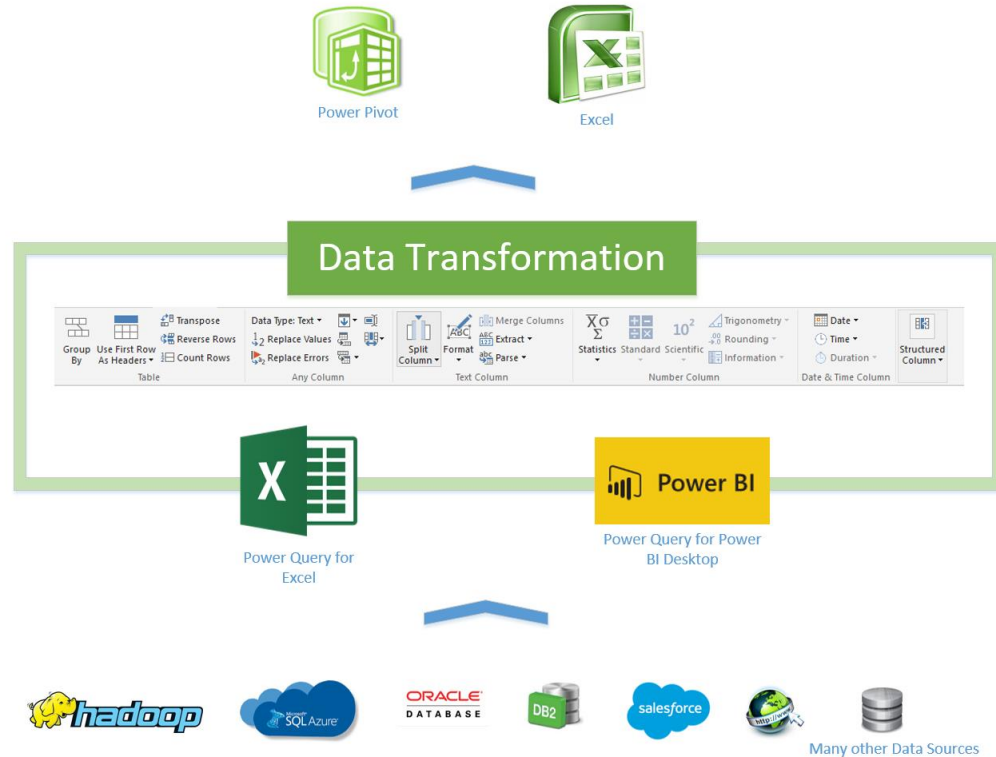

Power Query

Power Query is a data connection technology that enables you to discover, connect, combine, and refine data sources to meet your analysis needs.

Types of Data Sources

Types of Data Sources

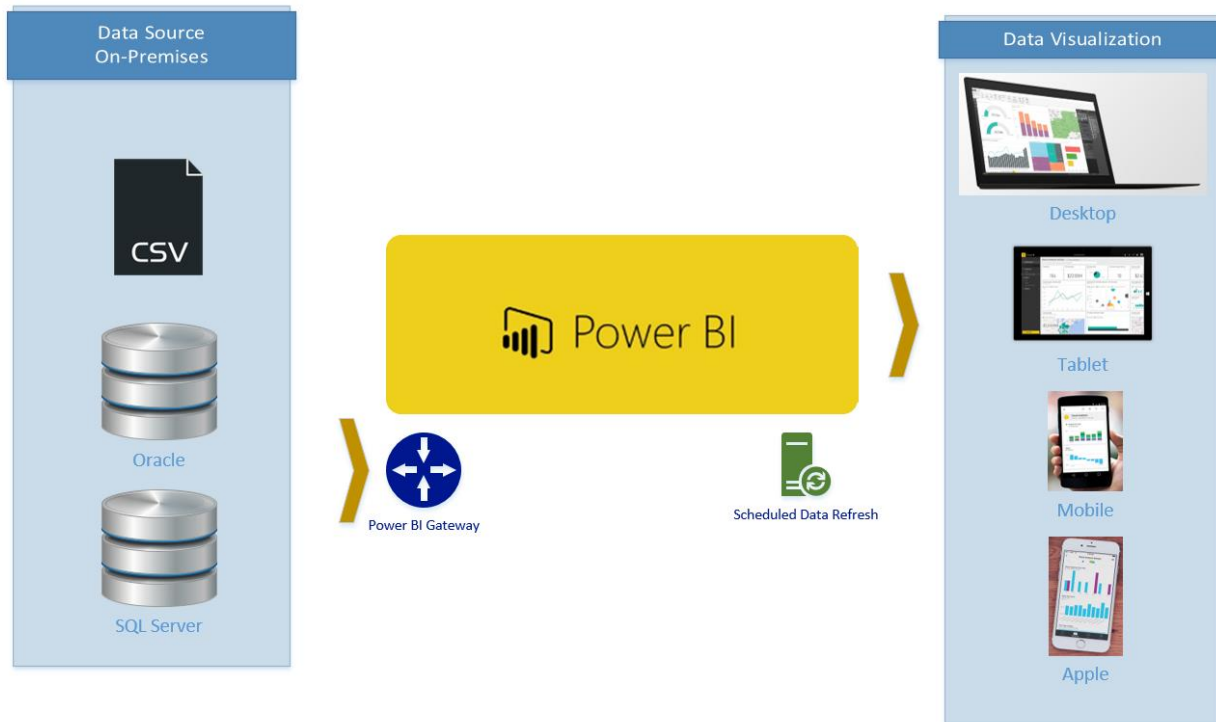

● On-Premises(Local)

● Online (Cloud Services)

Power BI Gateway

Type of Data importing

☉ Categories (Text Information)

Categorical data is the statistical **data** type consisting of **categorical** variables or of **data** that has been converted into that form

Date, Geography & Store, Channel, Product

☉ Calculation(Math/ Aggregations)

continuous data is quantitative data that can be measured.

it has an infinite number of possible values within a selected range e.g. temperature range.

discrete data is quantitative data that can be counted and has a finite number of possible values e.g. days of the week.

Net Profit, Net Quantity, Order Count

Power BI

Power BI is a collection of software services, apps, and connectors that work together to turn your unrelated sources of data into coherent, visually immersive, and interactive insights.

drillthrough

drillthrough fields here

1. Open Power BI and Create New Document
2. Click Get Data -> Select Excel
3. Select the Data table or sheet, if both available select Table -> Click Load

Report Development Process

Data Source

Each refresh pulls all data from a source to a dataset

Dataset with queries

Report

Power BI Desktop

CONNECT

to *multiple* data sources including Excel and Access DB

TRANSFORM

clean and shape your data

MODEL

your data to define relationships, calculated columns, number formatting and data categories

Features available in both Desktop and Service

Power BI Service

SHARE

your reports and dashboards by publishing to web, printing, exporting to PowerPoint, creating QR codes or sharing securely with colleagues

INSIGHTS

of your data can be discovered by Power BI using Quick Insights

DASHBOARDS

can be created by pinning multiple reports, visuals and tiles

VISUALISE

your data in minutes with compelling charts, tables, cards and more, create mobile-friendly views and apply filters to focus your insights

CONNECT

to *single* data sources including Excel and online services

Connecting to a Folder as a Data Source

Combine or Append Data

COMBINING FLAT FILES

Part
2

- Data Cleanup
- Select Folder folder as a source -> send to data model
- Example: sales data for 2019, 2018, 2017 etc.

1. Get Data
2. Select Folder
3. Locate the folder

Table Types and Relational Data Modeling

Multiple Tables in Data Models

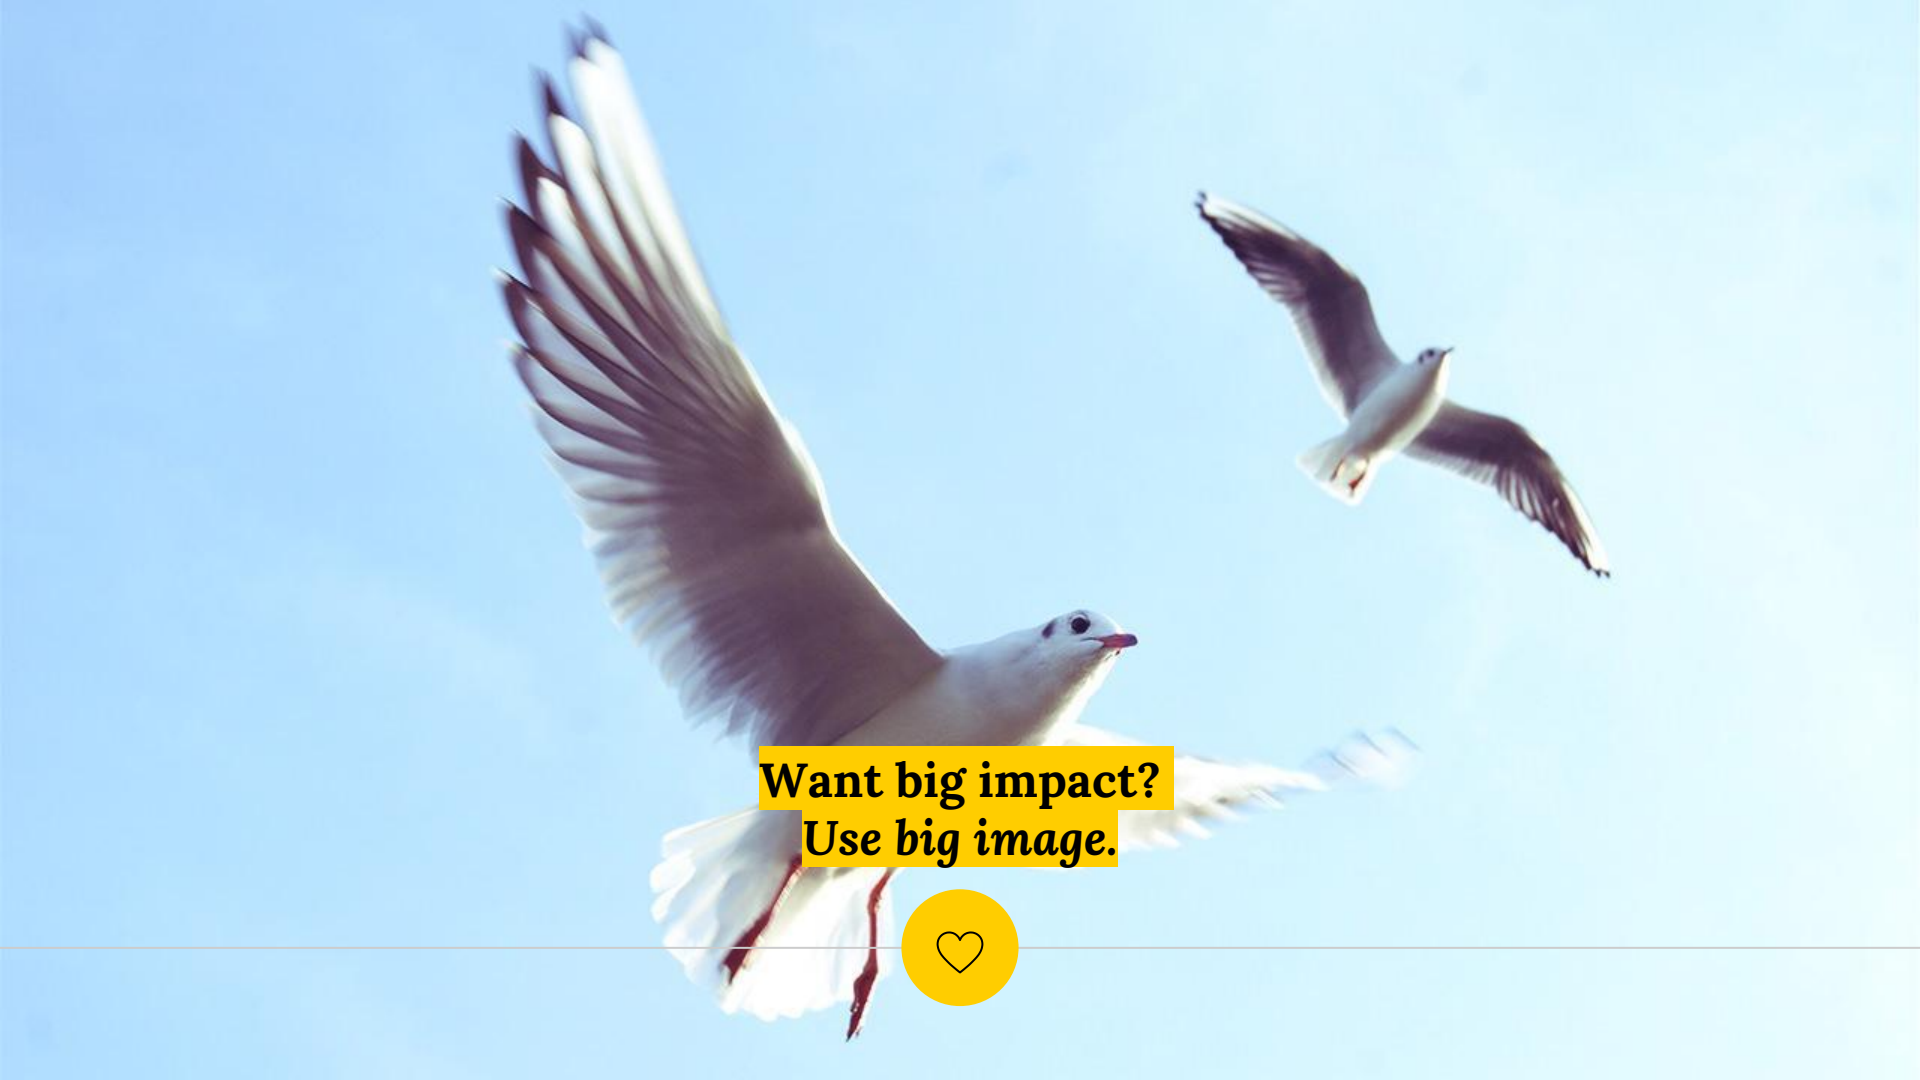

Multiple Tables in Data Models

- ⦿ Data Model
 - ⦿ Single Table
 - ⦿ Lookup Table
 - ⦿ Data Table
-
- ⦿ Why we avoid Melty table design?

Data Table Vs Lookup tables

A low-angle shot of two white doves in flight against a clear, bright blue sky. The dove in the foreground is larger, with its wings fully extended, showing the intricate structure of the feathers. Its head is turned slightly to the right. The second dove is smaller and positioned further back and higher up in the frame, also in flight. The overall composition is clean and uplifting.

**Want big impact?
Use *big image*.**

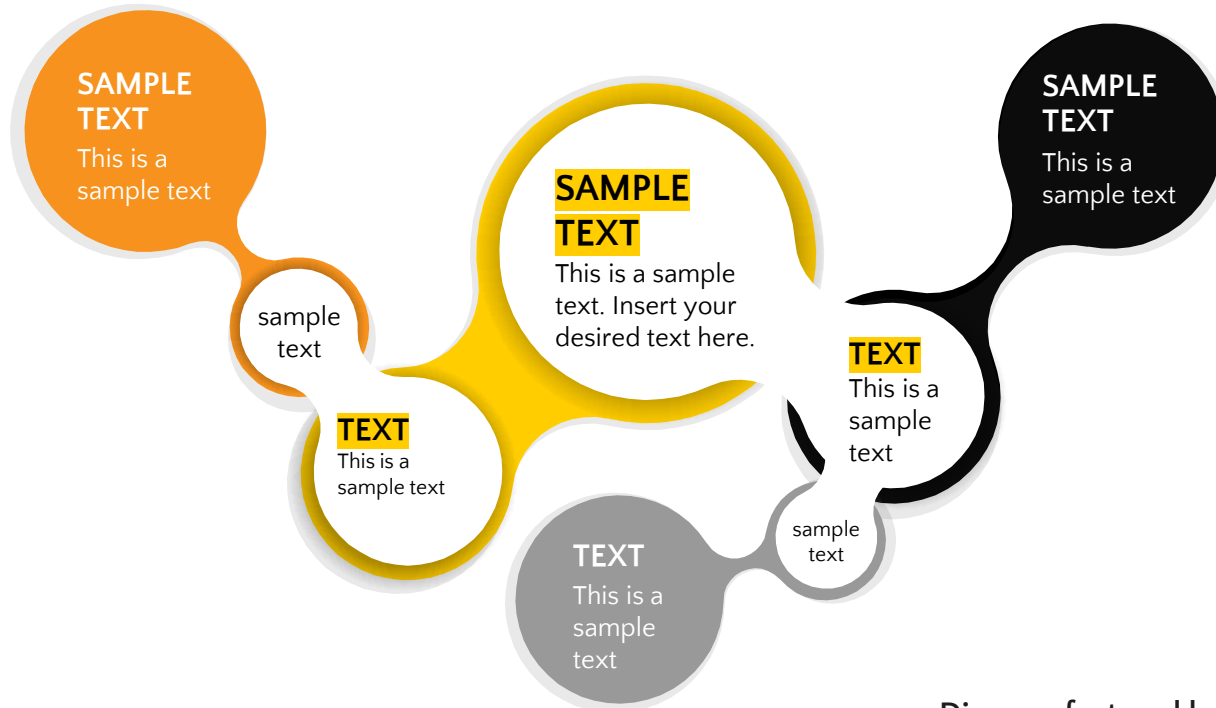

Use charts to explain your ideas

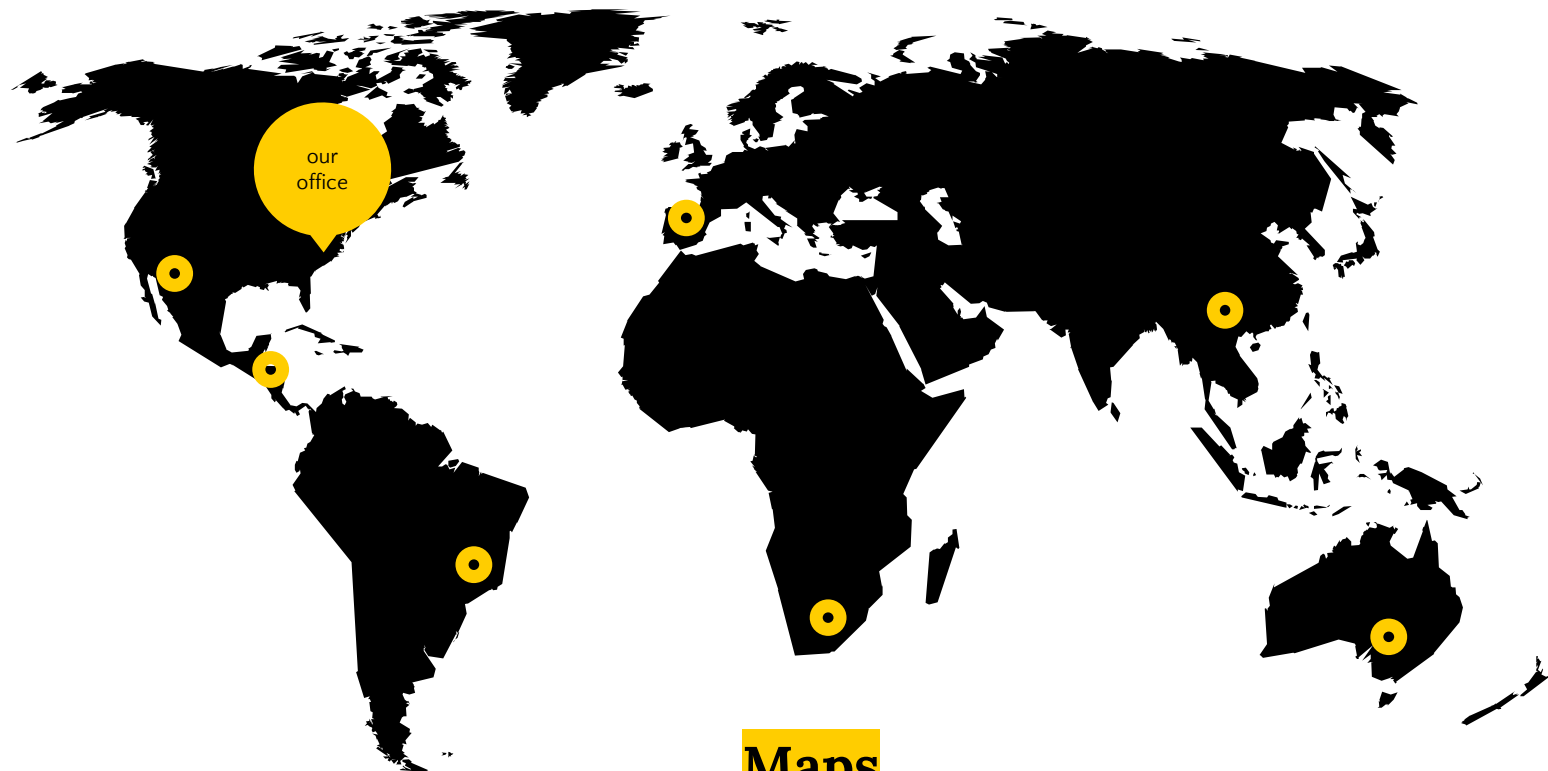

Or use **diagrams** to explain complex ideas

And tables to compare data

| | A | B | C |
|--------|----|----|----|
| Yellow | 10 | 20 | 7 |
| Blue | 30 | 15 | 10 |
| Orange | 5 | 24 | 16 |

Whoa! That's a big number, aren't you proud?

89,526,124\$

That's a lot of money

185,244 users

And a lot of users

100%

Total success!

Our process is easy

Let's review some concepts

Yellow

Is the color of gold, butter and ripe lemons. In the spectrum of visible light, yellow is found between green and orange.

Blue

Is the colour of the clear sky and the deep sea. It is located between violet and green on the optical spectrum.

Red

Is the color of blood, and because of this it has historically been associated with sacrifice, danger and courage.

Yellow

Presentation design

This presentation uses the following typographies and colors:

- Titles: **Lora**
- Body copy: **Quattrocento Sans**

You can download the fonts on these pages:

<https://www.fontsquirrel.com/fonts/lora>

<https://www.fontsquirrel.com/fonts/quattrocento-sans>

Yellow **#ffcd00** | Black **#000000** | Grey **#cccccc**

SlidesCarnival icons are **editable shapes**.

This means that you can:

- Resize them without losing quality.
- Change line color, width and style.

Isn't that nice? :)

Examples:

Now you can use any emoji as an icon!

And of course it resizes without losing quality and you can change the color.

How? Follow Google instructions

<https://twitter.com/googledocs/status/730087240156643328>

and many more...
